USEFUL INFORMATION

Product Prices

The rising and unstable cost of worldwide freight charges, shortage of raw materials and manufacturing costs, could mean that some product prices may have changed since this catalogue went to press.

Please contact our sales team for an up to date and accurate quotation on your chosen products.

Product Specifications

The colours, styles and finishes of all products in this catalogue were correct at time of going to press. However, all manufacturers reserve the right to alter or withdraw products and no responsibility can be accepted if this should happen.

Artwork

You will only get the best results from personalisation if your original artwork is of high quality. Our studio can help you with this if necessary - we will be pleased to quote based on your requirements. When providing your own artwork, please check with our sales office to ensure we receive the correct format for your job.

Company Logos

Many of the products in this catalogue feature a personalisation to show the potential use to our customers. By showing these names, trademarks or logos we are not implying that the product has been supplied to, or is endorsed by the owners of the same, and we apologise if there is any misunderstanding.

Colour Samples

Where colour options are shown, these are representative within the limitations of four colour process printing, and should not be regarded as truly accurate.

Carriage

This is normally charged on all orders.

VAT

All prices in this catalogue are exclusive of VAT.

Origination

Screens, dies, templates and embroidery tapes are chargeable at extra cost. The exact amount will vary according to the product chosen and the method of personalisation.

Delivery

Our aim is to deliver your goods as quickly and efficiently as possible. Most personalised products require 2-3 weeks production, some a little longer.

Express Service

If your deadlines are extremely urgent, a number of our products are available by express service. Please check with our sales department for exact timescales.

Quantities

All personalised orders are subject to production tolerances of between 5% and 10% over or under delivery, which will be invoiced accordingly.

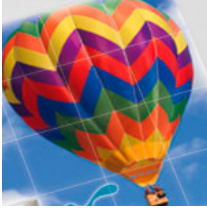

Product Finder

The product selection in this catalogue represents the most interesting and effective items in the marketplace. With literally thousands of products available, it is not possible to feature all the items we can offer. If you require a specific item that is not featured here, please ask us, we are certain to have it in our product database and our sourcing service is free!

RoHS and WEEE Directives

We have endeavoured to ensure that all items featured in this catalogue are compliant, but if you have any concerns, please do check with us.

BRANDING SOLUTIONS

DIGITAL PRINTING

Ideal for items with flat surfaces and where four colour process and more detailed images are required to be produced. Cyan, Magenta, Yellow and Black are used in different measures to obtain millions of shade and colour combinations on inkjet machinery.

PRINTING

The most popular and cost-effective technique of personalisation. This can take the form of screen printing, where ink is applied through a stencil placed on a porous material screen, or by pad printing where the ink and image are applied to the product by a pad.

LITHO PRINTING

This method is used to print artwork onto paper. The required image is first etched onto a metal plate and then transferred to a rubber roller. The image is then applied to the product from the roller.

ENGRAVING

Perfect for branding onto wood, metal and glass products to create a lasting impression. Most engraving is now completed by specialist computer guided laser machinery.

FOIL BLOCKING

A technique that leaves an impression onto the product by way of a heated metal dye. Colour, usually silver or gold, is added by placing a foil between the dye and the product.

DEBOSSING

Most often used on leather and PU products, like foil blocking, a heated metal plate is applied to the product and when removed leaves behind a plain, recessed impression of the logo or design.

DYE SUBLIMATION

Film containing dyes are placed onto the product and heated up by the print head. Pigments leave the film and attach to the product, cooling and re-solidifying. This method is commonly used on mugs and lanyards.

EMBROIDERY

Traditional stitching method using single or multi coloured thread or yarn for branding most clothing, including polo shirts, caps, other textiles and also some bags.

➤ 4-38517 **Bamboo Wireless Speaker**

Bamboo and plastic wireless speaker with multi-coloured lights. The 3W speaker has a rechargeable 3 mAh li-ion battery. Micro USB cable is included.

prodir

50-40878 Prodir QS40 True Biotic

With the QS40 True Biotic, we're taking another important step forward. Its casings are made from bio-based, non-toxic biopolymers (PHA) that biodegrade easily under natural conditions - in sea and soil, for example. Creation and decomposition follow the natural carbon cycle of nature.

Print area: 36 x 7mm

Colours: 

500 **£2.65** | 1000 **£2.35** | 3000 **£2.20**

50-28262 Prodir QS03 Ballpen

The casing of the new QS03 is structured like tyre tread. The Soft-Touch version is particularly effective for giving an authentic tyre tread feel.

Print area: 36 x 7mm

Colours: 

500 **£2.25** | 1000 **£1.95** | 3000 **£1.70**

50-38001 Prodir DS3 Regeneration
